## RESEARCH INTERESTS

I am a Ph.D. student at the Laboratoire de Mathématiques d'Orsay, Université Paris-Saclay, under the supervision of Alix Deruelle. My research lies at the interface of differential geometry and partial differential equations. I am currently studying the Kähler–Ricci flow emerging from singular spaces. I am also interested in related problems in canonical Kähler metrics, including Kähler–Ricci shrinkers and metrics of positive scalar curvature.

Geometric Analysis   Differential Geometry   Kähler Geometry   Kähler–Ricci Flow   Partial Differential Equations

## EDUCATION

### Université Paris-Saclay

Ph.D. in Fundamental Mathematics • Laboratoire de Mathématiques d'Orsay, Orsay, France  
Supervisor: Alix Deruelle

Sep. 2024 – Present

### Université Paris-Saclay

M2 in Fundamental Mathematics, programme AAG (*Arithmétique, Analyse, Géométrie*), Orsay, France

Sep. 2023 – Sep. 2024

Grade: 19.01/20

### École Polytechnique

Diplôme d'ingénieur (Engineer's Degree), Specialisation in Mathematics, Palaiseau, France

Aug. 2020 – Sep. 2024

GPA: 3.89/4.0

### Zhejiang University

Bachelor's Degree in Fundamental Mathematics, Chu Ko-chen Honors College, Hangzhou, China

Sep. 2017 – Jun. 2021

GPA: 4.2/5.0

## PUBLICATIONS
